

## SYNXIS CRS CHANNEL CONNECT PARTNER LIST

### Increase Channel Management Efficiency

Channel Connect integrates the SynXis CRS with online travel websites using the industry standard OpenTravel Alliance (OTA) XML specifications. This connectivity to hundreds of websites means the SynXis CRS Control Center becomes your *channel manager*.

#### KEY BENEFITS:

- Widens distribution of inventory at a lower cost
- Eliminates the need to manage separate extranets
  - Distributes property data, rates and availability directly from the SynXis CRS
- Decreases manual distribution efforts when coupled with a one or two-way interface between the SynXis CRS and hotel's Property Management System
- Enables hotels to better differentiate their products at the retail points of sale
- Allows for creation of distinct rate strategies per channel
- Provides properties and chains the ability to build their own custom booking engines

Our constantly expanding list of channel connect partners is regularly updated and currently includes the industry's leading global travel websites. Maximize revenue through participation in the right mix of channel connect programs.

#### THE CHOICE IS CHANNEL CONNECT:

The following pages list our current meta-search and traditional channel partners.

#### CHANNEL CONNECT

##### Features:

- ✓ *ARI (availability, rates and inventory) updates to the most popular online distribution channels*
- ✓ *Reservation delivery into SynXis CRS from the most popular online distribution channels \**

*\* Transaction fees apply.*

**Meta-Search Overview** – These popular comparison shopping interfaces empower users by displaying the lowest daily rates and availability. At the point of purchase the consumer is passed over to the supplier’s booking engine (hotel direct or OTA) in order to complete the transaction.

META-SEARCH PARTNER	AFFILIATES	TARGET MARKET	NOTES
<p><b>Google</b> <a href="http://www.google.com">www.google.com</a></p>		Global	Unlike other meta search websites, the hotel does not need to subscribe to Sabre Hospitality Solutions’ booking engine. In this case, a generic Sabre Hospitality booking engine would be used to complete the booking.
